FUN FACTS: ANIMALS WITH THE BEST HEARING READING AND MULTIPLE CHOICE

Directions: Read the passage and answer the questions.

Shhh... let's find out which animals have the best hearing.

The barn owl is a super listener, especially at night. It has a special shape to its face that helps it hear tiny sounds. It can even hear things we can't, like sounds that are way up high.

The African elephant also has amazing hearing. It can hear sounds that are super low, even below what we can hear. Elephants use their hearing to listen to each other talking from up to six miles away. That's very far!

<p>1. Why can barn owls hear well?</p> <p>a) Barns are loud. b) Barns are quiet. c) They can fly high. d) Their face shape.</p>	<p>2. Elephants can hear sounds that are</p> <p>a) lovely b) low c) loud d) musical</p>	<p>3. Elephants can hear sounds that are far away.</p> <p>a) true b) false</p>
