## FUN FACTS ABOUT BUTTERFLIES: READING AND MULTIPLE CHOICE

Directions: Read the passage and answer the questions.

Butterflies are amazing creatures! They start as tiny eggs and turn into caterpillars that eat lots of leaves so they can grow. Then, they make a cocoon and transform into beautiful butterflies.

They come in many colors like orange, yellow, blue, and purple. Some have special patterns to warn enemies to stay away.

Butterflies taste with their feet, and they love to drink nectar from flowers.

They can fly really far and fast despite being small and lightweight. They can even see colors we can't because they have a special kind of eyesight.

<p>1. What helps a butterfly grow?</p> <p>a) eating leaves b) making a cocoon c) drinking flowers d) flying fast</p>	<p>2. What do a butterfly's colors help them with?</p> <p>a) eating leaves b) flying c) warning enemies d) tasting</p>	<p>3. Butterflies can see colors humans cannot.</p> <p>a) true b) false</p>

## BUTTERFLIES DRAWING ACTIVITY

Directions: Butterflies go through a change once they grow strong. Draw and describe how a butterfly feels about the change it will go through.

The drawing area is a large rectangle. The top half is blank. The bottom half is divided into four sections, each containing three horizontal lines: a solid top line, a dashed middle line, and a solid bottom line.
