

WHAT IS COMPOSTING?

ReadingVine

WHAT IS COMPOSTING?

when organic scraps, oxygen, and water create super soil

SUPPLIES

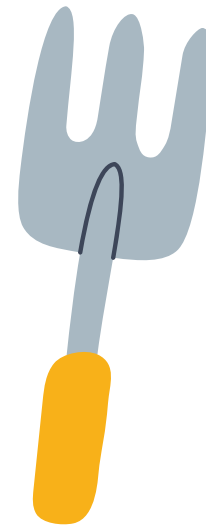

bin

water

garden tool

The background of the slide is a solid purple color. In the center, there is a white rounded rectangle. This rectangle is filled with a repeating pattern of light purple recycling symbols (three chasing arrows forming a triangle).

HOW DO YOU COMPOST?

place
scraps in
the bin

**water and move
the scraps around**

COMPOST

...KEEP ADDING!

WHY IS COMPOSTING IMPORTANT?

helps soil
stay moist

makes super
soil filled with
nutrients!

TIPS!

**chop big
pieces**

**water
regularly**

USE YOUR COMPOST SOIL FOR YOUR GARDEN
